

Junjie (Jamie) Hao

Austin, Texas | (737) 288-2761 | jamiehao@utexas.edu | <https://www.linkedin.com/in/jamie-hao-216098241/>

EDUCATION

University of Texas at Austin, Austin, TX

Exp. May 2029

BS in Biomedical Engineering

Relevant Coursework: Differential equations, Organic Chemistry, Engineering Physics, Probability and Statistics,

GPA: 3.7

INTERN EXPERIENCE

Porsche Cars, *Mechanical Design Intern*, Atlanta, GA

May 2026 – Aug. 2026

- Coordinated design reviews with quality and manufacturing teams across 2 key cross-functional alignments for PCM control unit integration, presenting pre-analyzed tradeoff options to boost team alignment on revision priorities by 25%.
- Validated prototype components across 3 durability and quality test cycles for regional market adaptation, documenting 6 key mechanical interference issues for pre-production revision.
- Updated 8 CAD drawing sets and release documentation in PLM, applying GD&T, 3D tolerance stack-up analysis, and manufacturability requirements.

PricewaterhouseCoopers (PwC), *Management Consulting Intern*, Beijing, China

Dec. 2025 – Feb. 2026

- Evaluated digital maturity, telemetry tracking, and e-commerce channel readiness across 6 regional markets to design a digital expansion strategy for a pharmaceutical client.
- Benchmarked 12 competitor digital pricing platforms and distributor margin structures, identifying a 15% pricing gap in tier-2 city healthcare channels.
- Mapped workflow integration and digital data-sharing across 4 hospital distribution networks to optimize the client's commercial market entry sequence.

Guangzhou Renxin MedTech Co. Ltd., *Intern*, Guangzhou, China

Jan. 2025 – Apr. 2025

- Co-developed biological age evaluation product and scoring algorithm, translating published biomarker research into a consumer-ready application for the China market.
- Contributed to algorithm development incorporated into a biotechnology patent application filed in China.
- Drove product launch in mainland China, reaching 2,000+ users at public release.

ACTIVITIES

Texas Accelerate, *Co-Founder, Director of Operations*, Austin, TX

Jan. 2026 –

- Co-founded student organization matching students with project-based work, building the operating model and employer partnership strategy; designed website and social media posts for new organization launch.
- Initiated cold outreach to 150+ prospective partners across business verticals to build a pre-launch project and sponsorship pipeline, securing 15+ confirmed client relationships and corporate sponsors.
- Pitched and secured corporate event sponsorship from companies including Accenture and Tesla; establishing a flagship enterprise partnership for the organization's launch.

Texas Engineering World Health, *Design Specialist*, Austin, Texas

Aug. 2025 –

- Developed convolutional neural network in PyTorch to classify myocardial perfusion SPECT scans as ischemic or non-ischemic, building toward clinical decision support for cardiac risk assessment.
- Preprocessed scans, segment left ventricular regions, and computed ischemia severity scores that correlate perfusion defects with cardiac risk.

Publication, *Biomedical Journal of Scientific & Technical Research*

Mar. 2026

- Zhang J., **Hao J.**, Qian X., Wu L., Yuan W., Zhang Y., Sun G., Wang L. "Model Construction for Safety Thresholds in Bloodletting Therapy: An Exploration of Precision Medicine Based on Multimodal Physiological Parameter Monitoring." *Biomedical Journal of Scientific & Technical Research*, vol. 65, no. 1, 2026. DOI: 10.26717/BJSTR.2026.65.010145

SKILLS

- Computer Skills:* Python (pandas/NumPy/PyTorch), MATLAB, FEA, CATIA, Figma, Microsoft Office Suite
- Language Skills:* English (Native), Mandarin Chinese (Native)
